

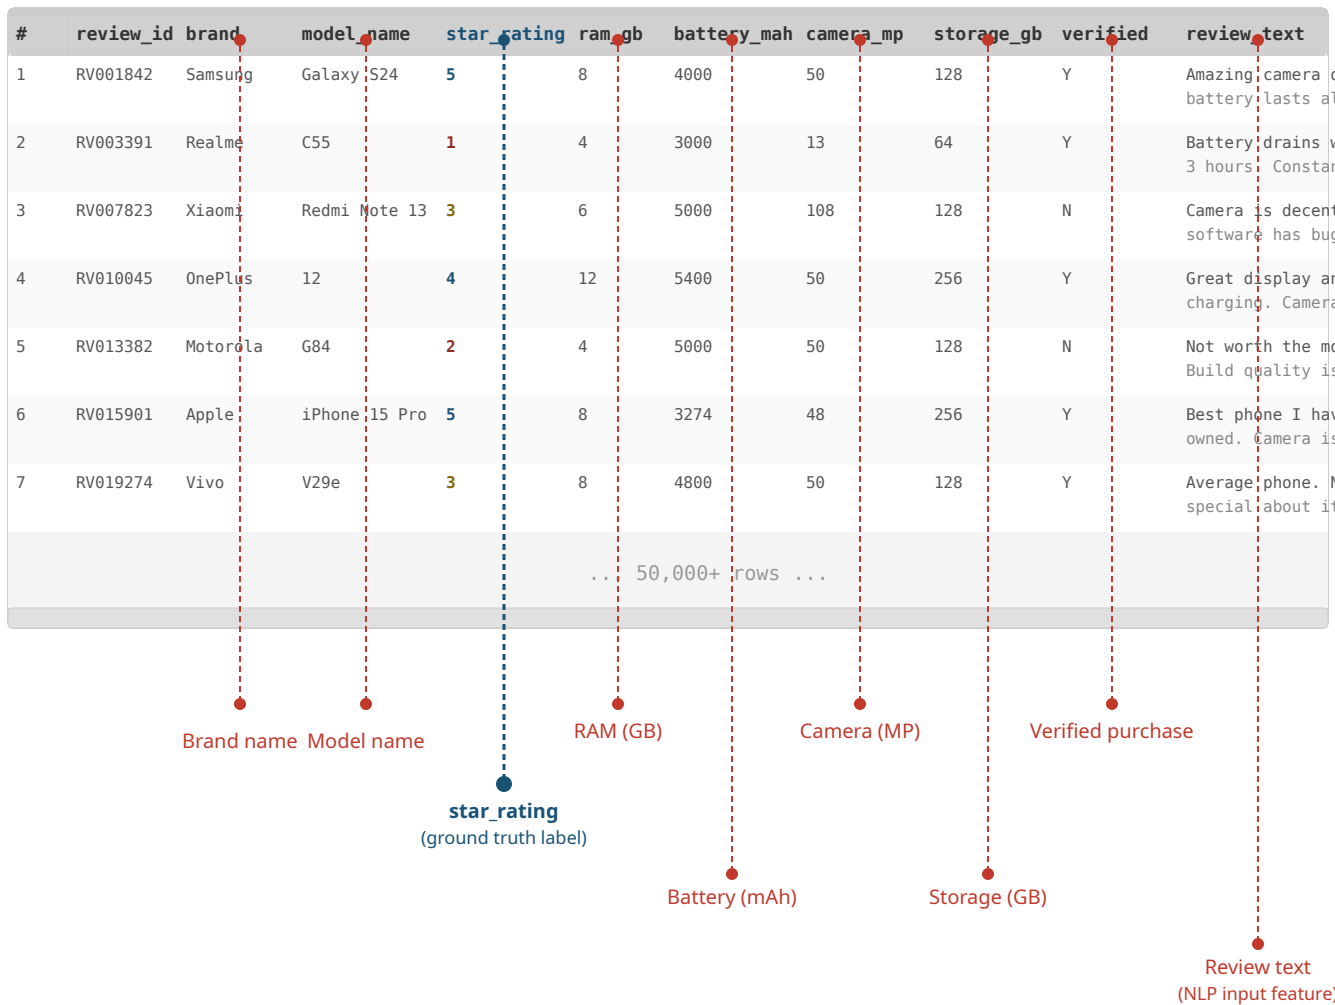

Fig. 2. A screenshot of the captured data from the Mobile Reviews Sentiment and Specification Dataset (2025 Edition) [14].

The table shows the raw CSV structure with 7 sample rows out of 50,000+ entries and ~25 columns. Red markers identify the key specification features (brand, ram_gb, battery_mah, camera_mp, storage_gb, verified_purchase) and the text input column (review_text). The blue-highlighted column star_rating (1–5) serves as the ground truth label.
